# 超級尼龍研磨輪

Non woven fabric abrasive wheel for polishing deburring

● 研磨輪  
Abrasive  
non-woven nylon wheel

## 特點

- 本品採用特殊加工法，以研磨材平均附著在不織布之纖維上。
- 研磨時因不斷有新的研磨材出現，所以被加工品表面之粗細度均能保持一定標準。
- 被研磨物無論如何複雜，均能完全密著研磨。
- 本品係以多孔性織物研磨材，故不會發生堵塞現象。

## FEATURES

It adopts special processing method to let grinding material adhering onto the fibre if non-wave fiber evenly. When grinding because new grinding material will show up continuously, the roughness of processed workpiece's surface can keep for a standard. No matter how complicate is the workplace, the grinding can be achieved completely. It can grind for porous fibre, so the blockade never happend.
